

Use your exciting RED batteries, raid and monitor and get in for one hell of a ride, without blowing your budget.

The ActionCam® «RED-edition» uses the same SLED, ARM and VEST as our field proven heavy load model the ActionCam® «zero-g». All components have been configured for light weight operation and are fully upgradable to our other models.

«The ActionCam is the most compact and feature-rich, yet easy to use, camera stabilizing system for professional film and video production on the market.»

ActionCam® «RED-edition»

| | |
|--|---|
| ARM The dual action "REVOLUTION" arm features a flat force curve throughout the entire range for effortless lifts. No-tools adjustment with a single knob and dust protected ball bearings on all critical joints for smoothest operating. | <ul style="list-style-type: none">• intuitive force curve• no-tools adjustment• load 5 - 35 kg / 11 - 77 lbs*• 96 cm / 37" lift *depending on numbers of springs per pack (standard configuration 5 - 20 kg / 11 - 44 lbs) |
| POST The length adjustable control handle and the bearing supported arm rod lets you operate the sled more naturally and faster, making impossible moves a thing of the past! | <ul style="list-style-type: none">• 2" / 50 mm diameter post• all cables run down the post• no-tools adjustment• "3" axis - high precision gimbal• length adjustable gimbal handle• X - Y fine balance adjustments at stage on both sides• unique stage lock-down ability |
| BACK MOUNTED VEST The ultra narrow back mounted vest is an ingenious solution that will transfer the system weight in a way that will keep you operating easier and safer like never experienced before. | <ul style="list-style-type: none">• back mounted design dramatically dropping overall effort of operating• entirely adjustable, requiring no custom fitting• overall wider freedom of operating• mounts with ratchet buckles• one size fits all |
